L-42 : Valuation Basis (Life Insurance)

Date: 30 Sep 2012

A chapter on Valuation basis covering the following minimum criteria should also be displayed on the web-site of the Insurers.

a. How the policy data needed for valuation is accessed ?

1: Input data for valuation process is generated by the IT team from the policy administration system in CSV, excel formats which are pre-specified.

2: Input data received from IT team is run through validation program whose purpose is to validate the data before using it for valuation process. Error data/ records (if any) is recitifed atcontract level before input it in to valuation process.

3: Summary statistics and moment analysis is prepared on the input data to see consistency in the data. Averages in respect of sum assured, premiums and premium per 1000 SA etc are used to check the data consistency.

4: Validated data is used to prepare the input file for the valuation models. Individual valuation of policy liablities is carried on proprietary actuarial software. Group valuation is carried ontested excel program.

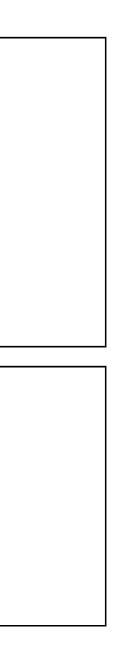

b. How the valuation bases are supplied to the system ?

1: Valuation basis is maintained in "Parameter Files" and these files are supplied to the valuation program. Valuation Basis is validated and updated (if required) at the end of each quarter.

1) Interest : Maxi segment	mum and	l Minimum interest rate taken for each	
i. Individual Busir	iess
