What you get

Note: For the purpose of illustration, we have assumed 8% p.a and 4% p.a as the higher and lower values of investment returns. These rates are not guaranteed, and they are not the upper or lower limits of returns of the funds selected in your policy, as the performance of funds depends on several factors including future investment performance. These rates in no way signify our expectations of future returns and the actual returns may be higher or lower.

What your nominee gets

Note: For the purpose of illustration, we have assumed 8% p.a and 4% p.a as the higher and lower values of investment returns. These rates are not guaranteed, and they are not the upper or lower limits of returns of the Funds selected in your policy, as the performance of funds depends on several factors including future investment performance. These rates in no way signify our expectations of future returns and the actual returns may be higher or lower.

Option 3: Dream Protect

Extra Allocation applicable to the respective Installment Premium post the death of the Life Assured shall be added to the fund as and when the installment premium is paid by the company into the fund. The Policy shall continue till maturity and all the future benefits under the policy will be paid to the beneficiary as and when due. All applicable charges, except mortality charges, will continue to be deducted from the unit fund.
- b. We will pay a monthly income equal to 8.33% of the Annualised Premium every month to the nominee till the end of the policy term starting from the first monthly death anniversary of the Life Assured.
- c. We shall also pay the Maturity Benefit (Fund Value) at the end of the policy term.

The Policy will terminate on the complete payment of Maturity Benefit at the end of the Policy Term.

To clearly understand how the death benefit works, let us refer to Ankit's story.

Systematic Transfer Option (STO)

Systematic Transfer Option (STO) is a feature which allows auto switching of units from one segregated fund to another segregated fund. You have the option to weekly transfer the Fund Value available under one specific Fund to another fund by making a written request to the Company. Once this feature is used, the Fund Value available under one specific fund will be transferred to another fund on a weekly basis for 48 weeks. The policyholder can submit STO request anytime during the policy term. The policyholder cannot make another STO request until the current STO instruction has been completed or has been cancelled.

The fund from which the units will be transferred is called the 'Selected Fund' and the fund to which the units will be deposited is called the 'Target Fund'. At any point in time, a STO request is only applicable between any one Selected Fund and any one Target Fund. The remaining 4 funds will not be affected or participate in the STO.

Once a STO request is placed, units from the Selected Fund will be transferred to the Target Fund through 48 automatic switches on the 7th, 14th, 21st and 28th of each calendar month for a 12-month period. Under every automated switch in a given STO, $1/x^{\text{th}}$ of units from the Selected Fund will be transferred to the Target Fund, where x = no of automatic switches which are left to be done in the given STO request i.e. x will be 48 for the first automated switch, it will be 47 for the second automated switch and it will be 1 for the 48th automated switch.

Premiums paid by the policyholder can come in any of the 6 segregated funds. Future premium redirection can be done in any of the 6 segregated funds.

However, during the period in which STO is invoked, no switching can take place in any of the 6 segregated funds. The policyholder has the option to stop the STO by providing a written request to the company. Once the STO is stopped, the policyholder can switch units between segregated funds as needed.

A policyholder can make further STO requests after the completion of a previous STO request. STO will apply to both future premiums as well as existing premiums in the Selected Fund. The NAV applicable for STO will be the NAV of the Selected Fund and target fund, on the day when the STO takes effect.

STO will not be activated when the Auto Invest Rule is active.

For Option 3: Dream Protect, the STO request will not be allowed after the death of the Life Assured.

STO will stop if:

- a. The fund value of the Selected Fund becomes zero or
- b. The policyholder has submitted a request to stop the STO

There are no charges for STO.

Systematic Partial Withdrawal

This feature allows the policyholder to withdraw a monthly amount from the policy during the policy term. This feature is only available under Option 1: Wealth Creation and Option 2: Retire Smart. At any time during the policy term after the end of the lock-in period, the policyholder may request us to make systematic partial withdrawals from the fund under the policy. The policyholder shall be required to specify the withdrawal start date, amount of withdrawal and the number of withdrawals to be done in the request. The monthly amount withdrawn from the fund shall be paid at the end of each calendar month following the withdrawal start date.

- i) The withdrawal start date must be after the completion of the premium payment term.

- iii) The number of withdrawals should be such that all withdrawals occur prior to the maturity date.
- iv) The monthly withdrawal amount should be at least Rs. 5,000 and should be in multiples of '000.

- iii) Termination of policy due to death, maturity, Surrender or discontinuance.

No charges shall be deducted for Systematic Partial Withdrawal.

Fund Allocation Strategy

The plan offers two fund allocation strategies which can be chosen at the start of the policy or at any time during the policy term. The policyholder can request to change the fund allocation strategy anytime during the policy term.

- a. **Self-Invest Rule:** Under this option, the policyholder can select the apportionment of his/her premiums into the funds as per his/her choice among the six available funds.
- b. **Auto Invest Rule:** Under this option,
 - i. The premium shall be invested in only two segregated funds. Out of these two, the Future Income Fund (SFIN: ULIF002180708FUTUINCOME133) is a mandatory fund for investment. The Fund management charges of discontinued fund will be applicable during this period and no other charges will be applied.
