7. Fund Provision

7.1. Purpose of the funds

The Company has established the funds set out in the schedule of Investment funds hereto from which part or all of the benefits under this policy will be payable.

7.2. Investment of the funds

The Company shall select the underlying investments of each fund at its sole discretion subject to the investment objective of the respective funds and the IRDA Regulations on investment of the funds.

All assets relating to the fund shall be and shall remain in the absolute beneficial ownership of the company. There is no trust created, whether expressly or impliedly, by the company in respect of the investments.

7.3. New funds / closure of funds

The Company may in future offer you additional unit linked funds with prior approval of IRDA. The Company by giving you reasonable notice may withdraw existing unit linked funds either for future premiums or for existing unit account balances in which case we will ask you for instructions for the future direction of your premiums.

8. Valuation of funds

The value of the fund shall be equal to the number of units multiplied by the Net Asset Value (NAV) of each unit in the fund.

The computation of NAV shall be based on whether the Company is purchasing (appropriation price) or selling (expropriation price) the assets in order to meet the day to day transactions of unit allocations and unit redemptions i.e. the Company shall be required to sell/purchase the assets if unit redemptions/allocations exceed unit allocations/redemptions at the valuation date.

The **Appropriation price** shall apply in a situation when the Company is required to purchase the assets to allocate the units in a Fund at the valuation date. This shall be the amount of money that the company should put into the fund in respect of each unit it allocates in order to preserve the interests of the existing policyholders.

The **Expropriation price** shall apply in a situation when the Company is required to sell assets to redeem the units in a Fund at the valuation date. This shall be the amount of money that the company shall take out of the fund in respect of each unit it cancels in order to preserve the interests of the continuing policyholders.

Computation of Net Asset Value(NAV):

When Appropriation price is applied: The NAV shall be computed as: Market value of investments held by the fund plus the expenses incurred in the purchase of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before any new units are allocated), gives the unit price of the fund under consideration.

When Expropriation price is applied: The NAV shall be computed as: Market Value of investment held by the fund less the expenses incurred in the sale of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before any units are redeemed), gives the unit price of the fund under consideration.

The valuation of assets underlying the unit linked funds will take place on a daily basis. In case the valuation day falls on a holiday, then the exercise will be done the following working day.

In case of market uncertainties where it is difficult to value some of the assets, the valuation shall be done on a less frequent basis. Examples of such circumstances are:

- When one or more stocks exchanges which provide a basis for valuation for a substantial portion of the assets of the fund are closed otherwise than for ordinary holidays.
- When, as a result of political, economic, monetary or any circumstances out of our control, the disposal of the assets of the unit fund are not reasonable or would not reasonably be practicable without being detrimental to the interests of the remaining unit holders.
- During periods of extreme volatility of markets during which surrenders and switches would, in our opinion, be detrimental to the interests of the existing unit holders of the fund.

- In the case of natural calamities, strikes, war, civil unrest, riots and bandhs.
- In the event of any 'force majeure' or disaster that affects our normal functioning.
- If so directed by the IRDA.
