purchasing (appropriation price) or selling (expropriation price) the assets in order to meet the day to day transactions of unit allocations and unit redemptions i.e. the Company shall be required to sell/purchase the assets if unit redemptions/allocations exceed unit allocations/redemptions at the valuation date.

The Appropriation price shall apply in a situation when the Company is required to purchase the assets to allocate the units in the Fund at the valuation date. This shall be the amount of money that the company should put into the fund in respect of each unit it allocates in order to preserve the interests of the existing policyholders.

The Expropriation price shall apply in a situation when the Company is required to sell assets to redeem the units in the Fund at the valuation date. This shall be the amount of money that the company shall take out of the fund in respect of each unit it cancels in order to preserve the interests of the continuing policyholders.

Computation of Net Asset Value (NAV):

When Appropriation price is applied: The NAV shall be computed as: Market value of investments held by the fund plus the expenses incurred in the purchase of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing this by the number of units existing at the valuation date (before any new units are allocated), gives the unit price of the fund under consideration.

When Expropriation price is applied: The NAV shall be computed as: Market Value of investment held by the fund less the expenses incurred in the sale of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing this by the number of units existing at the valuation date (before any units are redeemed), gives the unit price of the fund under consideration.

The valuation of assets underlying the unit linked funds will take place on a daily basis. In case the valuation day falls on a holiday, then the exercise will be done the following working day.

In case of market uncertainties where it is difficult to value some of the assets, the valuation shall be done on a less frequent basis. Examples of such circumstances are:

- When one or more stocks exchanges which provide a basis for valuation for a substantial portion of the assets of the fund are closed otherwise than for ordinary holidays.
- When, as a result of political, economic, monetary or any circumstances out of our control, the disposal of the assets of the unit fund are not reasonable or would not reasonably be practicable without being detrimental to the interests of the remaining unit holders.
- During periods of extreme volatility of markets during which surrenders would, in our opinion, be detrimental to the interests of the existing unit holders of the fund.
- In the case of natural calamities, strikes, war, civil unrest, riots and bandhs.
- In the event of any 'force majeure' or disaster that affects our normal functioning.
- If so directed by the IRDA.

3. STATEMENT OF AGE

This Policy is issued at the age shown on the Policy Schedule which is the life assured's declared age last birthday at the commencement date of the Policy.

In the event the age so admitted (the correct age) is found to be different from the age declared in the Proposal, without prejudice to the Company's other rights and remedies including those under the Insurance Act, 1938, one of the following actions shall be taken:

- a. If the correct age is such as would have made the Life Assured uninsurable under the plan of insurance specified in the Policy document, the plan of insurance shall stand altered to such plan of insurance as is generally granted by the Company for the correct age of the Life Assured, which will be subject to the terms and conditions as are applicable to that plan of insurance. If it is not possible to grant any other plan of insurance, the Policy shall stand cancelled from the date of issue of the Policy and the premium paid shall be refunded subject to the deduction of the expenses incurred by the Company on the Policy. Where premiums have been allocated to units, the Fund Value as on the date of cancellation will be payable.
- b. If the correct age is higher than the age declared in the Proposal, the insurance charges payable under the Policy shall be altered corresponding to the correct age of the Life Assured (the corrected insurance charges) from the date of commencement of the Policy and you shall pay to the Company the accumulated difference between the corrected insurance charges and the original insurance charges from the commencement of the Policy up to the date of such payment with interest. If you fail to pay such accumulated difference, together with interest, the same shall be recovered by cancellation of Units.
- c. If the correct age of the Life Assured is lower than the age declared in the Proposal, the insurance charges payable under the Policy shall be altered corresponding to the correct age of the Life Assured (the corrected insurance charges) from the date of commencement of the Policy and the Company may, at its discretion, allocate without interest, the accumulated difference between the original insurance charges paid and the corrected insurance charges into units.
