Brief details on valuation data covering its accuracy, completeness and reasonableness and how the data flows to the valuation system

Input data for valuation process is generated by the IT team from the policy administration system in CSV, excel formats which are pre-specified.

Input data received from IT team is run through validation program to validate the data before using it for valuation process. Error data/ records (if any) is rectified at contract level before being inputted into the valuation process.

Summary statistics and movement analysis is prepared on the input data to see consistency in the data. Movement in respect of premiums, benefits, etc. are used to check the data consistency and reasonableness.

Validated data is used to prepare the input file for the valuation models. Individual valuation of policy liabilities is carried on actuarial software. Valuation for Group Credit Life is carried on actuarial software, while for other Group Products, valuation is carried using MS Access/ Excel models.

Brief mention of any significant change in the valuation basis and /or methodology

The following changes are made in JAS 2022 from the previous quarter:

Expenses: No changes. Valuation expense assumptions are unchanged, however they have been inflated as per the assumed best estimate inflation rate when compared with valuation inflation rate.
